

WOMEN'S VOICE AND LEADERSHIP – PAKISTAN

CYBER CRIME & CYBER SECURITY

Any activity commissioned via computer, digital devices, and networks used in the cyber realm, and is facilitated through the internet medium. It can include the distant theft of information belonging to an individual, government, or corporate sector through criminal trespassing into unauthorized remote systems around the world. It includes from stealing millions of rupees from online banks to harassing and stalking cyber users.

Cyber Crime also includes sending viruses on a different system or posting defamation messages. Commission of cybercrime can be:

- The computer as a target-attacking the computers (e.g spreading viruses etc)
- The computer as a weapon-to commit fraud or illegal gambling
- The computer as an accessory- to store illegal or stolen information
